📁 EXPERIENCE

Ayusv Technologies Pvt. Ltd., Full Stack Developer

May 2025 – September 2025 | Noida

- Ablyworks ([Project Link](#))
- Architected and delivered a scalable **ATS** from scratch as a product-grade **SaaS application** using **React.js (Parcel)** and **Node.js/Express.js**, implementing modular, reusable, and maintainable architecture.
- Built secure, production-ready **RESTful APIs** including **sign/sign-up (Admin & Superadmin)**, role and permission management, and enquiry handling, ensuring all requests follow **RBAC** and enterprise-level security.
- Implemented **JWT-based authentication**, rate limiting, centralized error handling, and protection against **XSS/CSRF attacks**, ensuring enterprise-grade security compliance.
- Enhanced frontend state management and performance using **Context API**, **Redux Toolkit**, **useMemo**, **lazy loading**, and **Shimmer UI**, improving UX and load times.
- Designed and integrated **MySQL databases** with **Sequelize ORM** and migrations, enabled real-time updates via **WebSockets**, improved scalability using the **Node.js cluster module**, and ensured reliability through Jest testing and structured logging.
- Mentored junior developers, conducted code reviews, promoted best practices, coordinated team tasks, and advised on technical architecture and project planning.

MS Technology Pvt. Ltd. [🔗](#), Software Engineer

February 2024 – January 2025 | New Delhi

- eViewer HTML5 Document Viewer ([Project Link](#))
- Developed a **dynamic HTML5 document viewer (Project Link)** using **Angular**, **React**, **JavaScript (ES6+)**, and **TypeScript**, delivering features such as document loading, rendering, zooming, and text search.
- Built and secured **RESTful APIs** with **Node.js** and **Express.js**, implementing **JWT/OAuth2 authentication** and **RBAC** for access control.
- Improved performance with **lazy loading**, achieving a **30% performance improvement**, and resolved complex issues related to **eSignature**, **stamps**, **annotations**, and **regression bugs**.
- Integrated **MongoDB**, **PostgreSQL**, and **MySQL** databases.

Perennation Computer Solutions Global Pvt. Ltd. [🔗](#), Software Engineer

September 2021 – September 2023 | Kolkata

- Built and contributed to robust, scalable web applications using **React.js**, **JavaScript**, **Tailwind CSS**, **Spring Boot**, and **MySQL**.
- Developed **invoice generation systems** with dynamic invoice creation, automated calculations, **PDF export**, and client-specific customization.
- Streamlined UI/UX to enhance productivity, created responsive layouts, and delivered smooth, intuitive user experiences.
- Designed and executed full-stack functionality by seamlessly integrating frontend interfaces with backend logic.

🎓 EDUCATION

B.Tech in Computer Science and Engineering,

Gandhi Engineering College (BPUT) [🔗](#)

2016 – 2020 | Bhubaneswar

🧠 TECH SKILLS

Frontend — MicroServices | React.js, JavaScript (ES6+) | Context API, Redux Toolkit | Parcel, Webpack, Vite Bundler | Tailwind CSS, Shimmer UI | Axios, Performance Optimization (useMemo, lazy loading)

Backend — MicroServices | Node.js, Express.js | RESTful API Design | WebSockets | JWT Authentication, RBAC, OAuth2 | Rate Limiting, Centralized Error Handling | XSS & CSRF Protection

Database & ORM — MySQL, MongoDB | Sequelize ORM | Database Design & Migrations

Testing & Dev Tools — Jest, React Testing Library | Postman, Swagger / OpenAPI | Git & Version Control | Application Logging & Monitoring

📁 PROJECTS

JDine [🔗](#), Food Ordering Web Application

- Github URL [🔗](#)
- Built a production-ready food ordering application using the latest **React.js** and **Tailwind CSS**, with **Parcel** for optimized bundling.
- Applied **Redux** and **Context API** for efficient state management, along with reusable **higher-order components** for scalability.
- Used **React Router** for seamless navigation and **lazy loading** to improve performance.
- Integrated **Shimmer UI** to enhance UX during data loading and wrote unit tests using **Jest**.
- Developed reusable custom components with clean, enhanced code, ensuring full **mobile and desktop responsiveness**.
